

MESOSPHERE SERVICES: DC/OS DISCOVERY

Overview

Mesosphere provides a range of consulting services to help customers accelerate their adoption of Mesosphere DC/OS, a production-proven platform to easily deploy and elastically scale containers and big data services seamlessly across on-premise hardware and and public cloud instances. Mesosphere works closely with our customers to ensure they are successful designing, deploying and operating a DC/OS environment. Access to Mesosphere’s knowledge, experience and operational guidance allows customers to avoid common pitfalls and decrease time to market.

DC/OS Discovery

During a 5-day engagement including consulting and education courses, Mesosphere architects engage with your team to conduct preparatory discovery activities for a project involving deployment of the Mesosphere DC/OS platform.

Typical Activities:

- Review your use case and align your needs with the technical deployment of DC/OS
- Assess the potential project’s timeline
- Align the design and business cases of transitioning to DC/OS and assess any skill gaps
- As needed, deliver training programs including “DC/OS Developer Fundamentals” and “Container Basics”

Deliverables:

- Discovery Engagement Summary Document

About Mesosphere Enterprise DC/OS

Mesosphere brings enterprises the power of cloud native technologies, with the control to run on any infrastructure — datacenter or cloud. Mesosphere DC/OS is the only production-proven platform that powers both modern app components — containers and data services — so businesses can accelerate time to market with confidence, and save. Based on Apache Mesos, DC/OS is trusted by Verizon, Autodesk, Charter, Esri and many other Fortune 1000 companies.
