

MESOSPHERE SERVICES: PRODUCTION READINESS TESTING

Overview

Mesosphere provides a range of consulting services to help customers accelerate their adoption of Mesosphere DC/OS, a production-proven platform to easily deploy and elastically scale containers and big data services seamlessly across on-premise hardware and and public cloud instances. Mesosphere works closely with our customers to ensure they are successful designing, deploying and operating a DC/OS environment. Access to Mesosphere's knowledge, experience and operational guidance allows customers to avoid common pitfalls and decrease time to market.

Production Readiness Testing

Over this 5-day engagement, Mesosphere architects will work with the customer team to review the DC/OS cluster for readiness to move to a production environment. The Mesosphere and customer teams execute a review against a test plan to determine any configuration changes that may be advisable.

Typical Activities:

- Perform at-load test of the customer cluster
- Perform a usability test
- Perform an operations readiness assessment
- Validate configurations and operating system level

Deliverables:

- Test plan results and recommendations

About Mesosphere Enterprise DC/OS

Mesosphere brings enterprises the power of cloud native technologies, with the control to run on any infrastructure — datacenter or cloud. Mesosphere DC/OS is the only production-proven platform that powers both modern app components — containers and data services — so businesses can accelerate time to market with confidence, and save. Based on Apache Mesos, DC/OS is trusted by Verizon, Autodesk, Charter, Esri and many other Fortune 1000 companies.
