

# MESOSPHERE SERVICES: DC/OS DESIGN

## Overview

Mesosphere provides a range of consulting services to help customers accelerate their adoption of Mesosphere DC/OS, a production-proven platform to easily deploy and elastically scale containers and big data services seamlessly across on-premise hardware and and public cloud instances. Mesosphere works closely with our customers to ensure they are successful designing, deploying and operating a DC/OS environment. Access to Mesosphere's knowledge, experience and operational guidance allows customers to avoid common pitfalls and decrease time to market.

## DC/OS Design

During a 13-day engagement including consulting and education courses, Mesosphere architects work with your team to create a design for the Mesosphere DC/OS platform that most closely aligns with your use case.

### Typical Activities:

- Through a series of design workshops, define an architecture design that takes into consideration factors such as availability, manageability, performance, security, monitoring, custom integrations, service discovery, storage, and networking
- Delivery of the DC/OS Fundamentals Course for up to 15 students

### Deliverables:

- Design Document
- Initial Operations Runbook
- Initial Test Plan
- Deployment Step Checklist

## About Mesosphere Enterprise DC/OS

Mesosphere brings enterprises the power of cloud native technologies, with the control to run on any infrastructure — datacenter or cloud. Mesosphere DC/OS is the only production-proven platform that powers both modern app components — containers and data services — so businesses can accelerate time to market with confidence, and save. Based on Apache Mesos, DC/OS is trusted by Verizon, Autodesk, Charter, Esri and many other Fortune 1000 companies.
